Viewing Work in Progress in MyWTA

Enhancements have recently been made to MyWTA to enable users to see the test results of multiple lots on the one screen. While primarily intended to display the results of any lots in progress through the NZWTA laboratory, the function is also available for completed lots. This feature is accessible by selecting **WIP Status** from the Menu option available at the top of the main page (highlighted right).

Clicking on the **WIP Status** option will open a new screen with various details of the individual lots where the certificates are not completed. For each lot the key identification details (lot or reference number, brand, number of bales, etc) will be displayed along with any preliminary test results that are available. As used in the main MyWTA homepage, the various lots will be colour-coded depending on their status, including any lots where NZWTA is awaiting an electronic transmission of test data (bale weights). Where L&S testing has been requested, this screen will provide an indication of the stage of testing (eg tufting, reading etc).

Key: Test complete Some results available Test in progress Missing weights

Show Recently Completed Tests Refresh

Greasy Tests show Schlum Dry while Scoured Wool Tests show NZ Processing Yield.

Laboratory Work In Progress - Provisional Results ONLY															
Ref.	Lot No	Started	Brand	Bales	Subsamples	Yield Drying	Yield VM	Yield	Micron	Colour Y	Colour Y-Z	L&S Status	Len	Str	Exp Barbe
